

**Position Description/Duties**

The Norwich University Applied Research Institutes (NUARI) is looking for interested interns to participate in a fall internship consisting of 3-7 hours per week to support an ongoing DOD/Army research project. This position involves evaluating scraped data, enrichment for Machine Learning (ML) model training, and ongoing performance assessments, primarily focusing on data labeling for stance identification.

**Duties may include:**

- Data labeling
- Data sourcing
- Model validation
- Data evaluation
- Writing reports based on research findings

**Desired Attributes & Skills**

- Detail-oriented
- Capable of self-management
- Experience with remote, asynchronous jobs preferred
- Ability to analyze complex content
- Flexibility in taskings
- Communicative and responsive with superiors
- Comfortable writing reports in a professional manner
